PROGRAM 1

AIM:

To create a basic webpage for an Online Recipe Sharing Website using HTML lists and tables to display recipe categories and details.

ALGORITHM:

1. Start the HTML document.
2. Add title as Online Recipe Sharing Website.
3. Use heading tags to display website name.
4. Create an unordered list to display recipe categories.
5. Create an ordered list to display top recipes.
6. Create a table to display recipe details.
7. Apply basic CSS styling.
8. Close all HTML tags.

CODE:

```
<!DOCTYPE html>

<html>

<head>

<title>Online Recipe Sharing</title>

<style>
```

```
body { font-family: Arial; background-color: #fff8f0; }
h1 { text-align: center; color: darkred; }
table { border-collapse: collapse; width: 80%; margin: auto; }
th, td { border: 1px solid black; padding: 10px; text-align: center; }
th { background-color: #ff7043; color: white; }
```

```
</style>
```

```
</head>
```

```
<body>
```

```
<h1>Online Recipe Sharing Website</h1>
```

```
<h2>Recipe Categories</h2>
```

```
<ul>
```

```
<li>South Indian</li>
```

```
<li>North Indian</li>
```

```
<li>Desserts</li>
```

```
<li>Healthy Recipes</li>
```

```
</ul>
```

```
<h2>Top Recipes</h2>
```

```
<ol>
```

```
<li>Masala Dosa</li>
```

```
<li>Paneer Butter Masala</li>
```

```
<li>Chocolate Cake</li>
```

Veg Biryani

<h2 style="text-align:center;">Recipe Details</h2>

<table>

<tr>

<th>Recipe ID</th>

<th>Recipe Name</th>

<th>Category</th>

<th>Rating</th>

</tr>

<tr>

<td>R101</td>

<td>Masala Dosa</td>

<td>South Indian</td>

<td>4.8</td>

</tr>

<tr>

<td>R102</td>

<td>Chocolate Cake</td>

<td>Dessert</td>

<td>4.9</td>

</tr>

</table>

</body>

</html>

OUTPUT:

Online Recipe Sharing Website			
Recipe Categories			
• South Indian • North Indian • Desserts • Healthy Recipes			
Top Recipes			
1. Masala Dosa 2. Paneer Butter Masala 3. Chocolate Cake 4. Veg Biryani			
Recipe Details			
Recipe ID	Recipe Name	Category	Rating
R101	Masala Dosa	South Indian	4.8
R102	Chocolate Cake	Dessert	4.9

RESULT:

Thus, a basic webpage for an Online Recipe Sharing Website using lists and tables was created successfully.

PROGRAM 2

AIM:

To design a frameset-based Online Recipe Sharing Website with header, navigation menu, login, register and recipe catalogue pages.

ALGORITHM:

1. Create index.html using frameset.
2. Divide page into header and content frames.

3. Create navigation frame with links.
4. Create login and register pages using forms.
5. Create recipe catalogue page using table.
6. Link all pages properly using target attribute.
7. Execute the program in browser.

CODE:

index.html

```
<!DOCTYPE html>

<html>

<head>

<title>Online Recipe Sharing</title>

</head>

<frameset rows="20%,80%">

<frame src="header.html">

<frameset cols="25%,75%">

<frame src="nav.html">

<frame src="login.html" name="content">

</frameset>

</frameset>

</html>
```

header.html

```
<html>

<body style="background-color:darkred;color:white;text-align:center;">
```

```
<h1>Online Recipe Sharing Website</h1>
```

```
</body>
```

```
</html>
```

nav.html

```
<html>
```

```
<body style="background-color:lightyellow;">
```

```
<h3>Menu</h3>
```

```
<a href="login.html" target="content">Login</a><br><br>
```

```
<a href="recipes.html" target="content">Recipes</a><br><br>
```

```
<a href="register.html" target="content">Register</a>
```

```
</body>
```

```
</html>
```

login.html

```
<html>
```

```
<body>
```

```
<h2>Login Page</h2>
```

```
<form>
```

```
Username: <input type="text"><br><br>
```

```
Password: <input type="password"><br><br>
```

```
<input type="submit" value="Login">
```

```
</form>
```

```
</body>
```

```
</html>
```

register.html

```
<html>
<body>
<h2>Register to Share Recipes</h2>
<form>
Name: <input type="text" required><br><br>
Email: <input type="email" required><br><br>
Password: <input type="password" required><br><br>
<input type="submit">
<input type="reset">
</form>
</body>
</html>
```

recipes.html

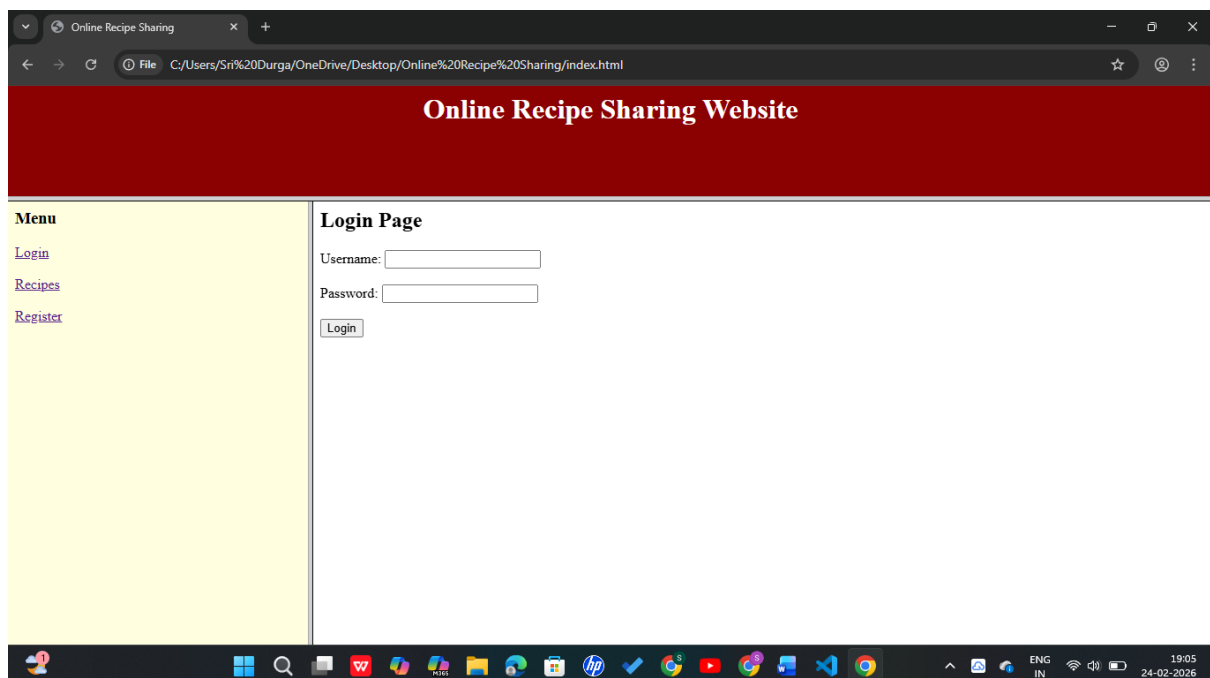

```
<html>
<body>
<h2>Recipe Catalogue</h2>
<table border="1" cellpadding="10">
<tr>
<th>ID</th>
<th>Name</th>
<th>Preparation Time</th>
</tr>
<tr>
```

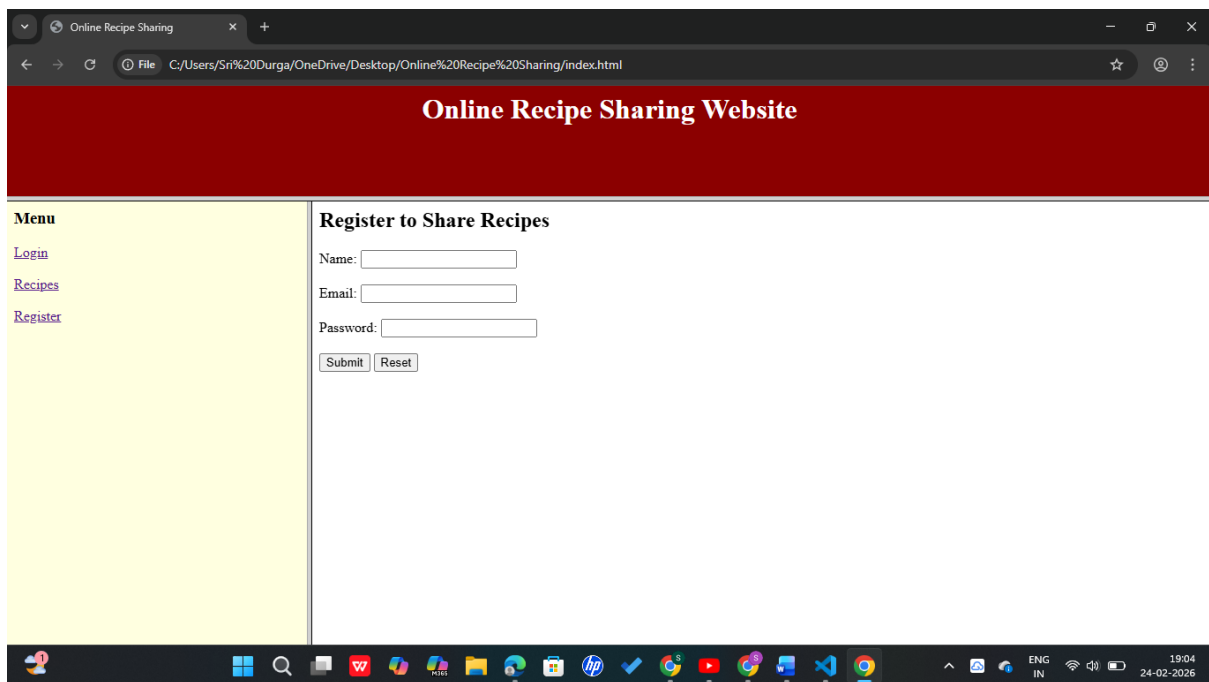

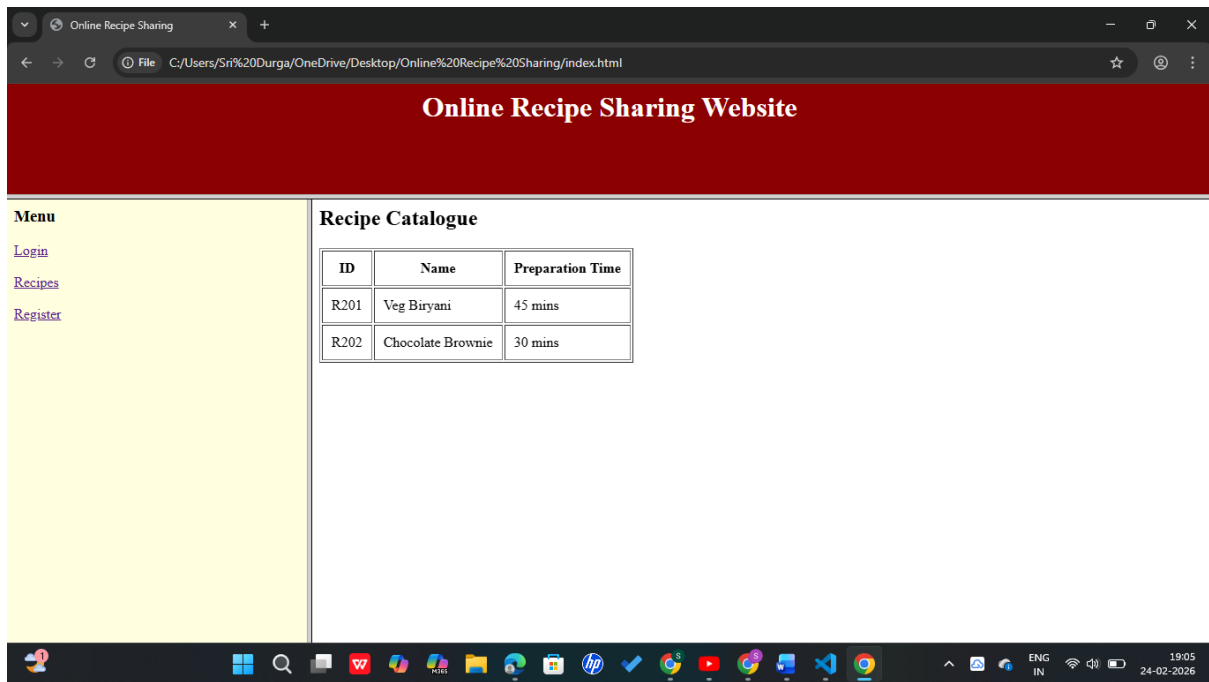

```

<td>R201</td>
<td>Veg Biryani</td>
<td>45 mins</td>
</tr>
<tr>
<td>R202</td>
<td>Chocolate Brownie</td>
<td>30 mins</td>
</tr>
</table>
</body>
</html>

```

OUTPUT

RESULT:

Thus, a frameset-based Online Recipe Sharing Website was created successfully.

PROGRAM 3

AIM:

To demonstrate the use of iframe in an Online Recipe Sharing Website to display recipe images.

ALGORITHM:

1. Create main page with hyperlink.
2. Create iframe with name attribute.
3. Create image page with recipe image.
4. Link hyperlink to iframe using target.
5. Execute the program.

CODE:

Index1.html

```
<!DOCTYPE html>

<html>

<head>

    <title>Recipe Image Viewer</title>

</head>

<body>

<h1>View Recipe Image</h1>

<a href="imagepage.html" target="frame1">Load Recipe Image</a>

<br><br>

<iframe name="frame1" width="500" height="300"></iframe>

</body>

</html>
```

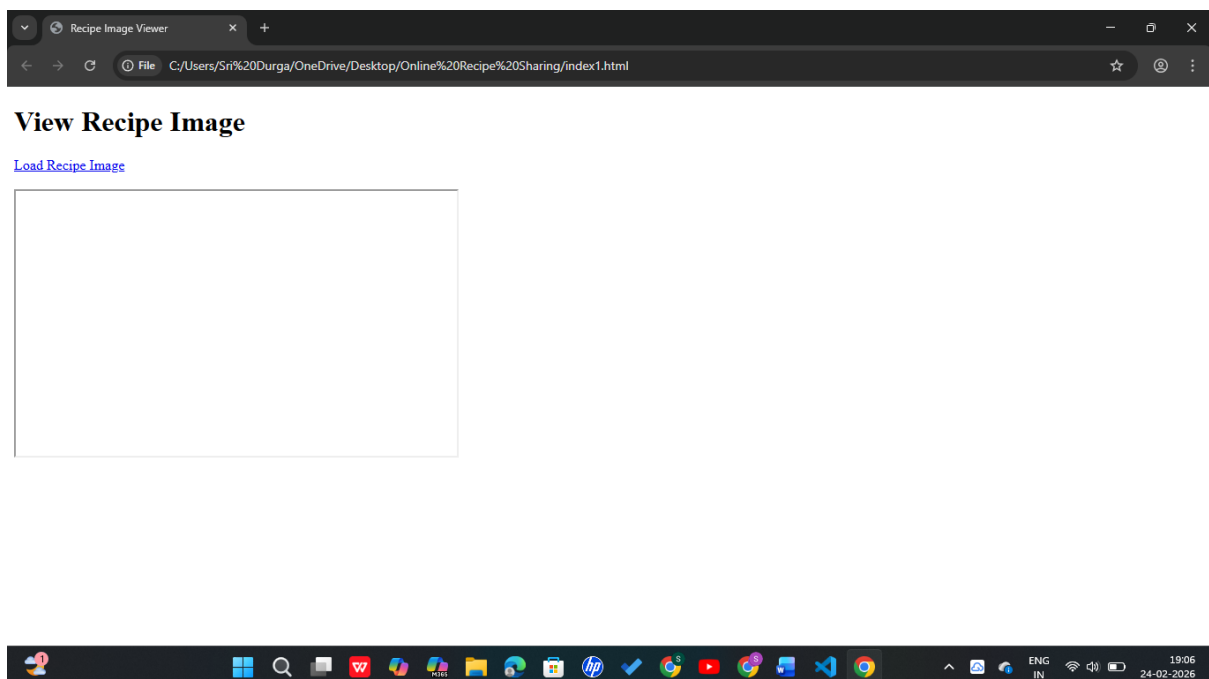

Imagepage.html

```
<!DOCTYPE html>

<html>
```

```
<body>
<h3>Recipe Preview</h3>

</body>
</html>
```

RESULT:

Thus, the iframe was successfully used to display recipe images dynamically.

PROGRAM 4

AIM:

To create a Recipe Submission Form using various HTML form elements.

ALGORITHM:

1. Start HTML document.

2. Add form tag with method attribute.
3. Add input fields for recipe name and email.
4. Add select dropdown for category.
5. Add radio buttons for difficulty.
6. Add textarea for ingredients.
7. Add submit and reset buttons.
8. Execute the program.

CODE:

recipe_form.html:

```
<!DOCTYPE html>
```

```
<html>
```

```
<head>
```

```
    <title>Recipe Submission Form</title>
```

```
</head>
```

```
<body>
```

```
<h1>Submit Your Recipe</h1>
```

```
<form action="submit.html" method="POST">
```

Recipe Name:

```
<input type="text" required><br><br>
```

Email:

```
<input type="email" required><br><br>
```

Category:

<select required>

<option value="">Select</option>

<option>South Indian</option>

<option>North Indian</option>

<option>Desserts</option>

<option>Healthy</option>

</select>

Difficulty:

<input type="radio" name="difficulty" required> Easy

<input type="radio" name="difficulty"> Medium

<input type="radio" name="difficulty"> Hard

Ingredients:

<textarea rows="4" cols="30" required></textarea>

<input type="submit">

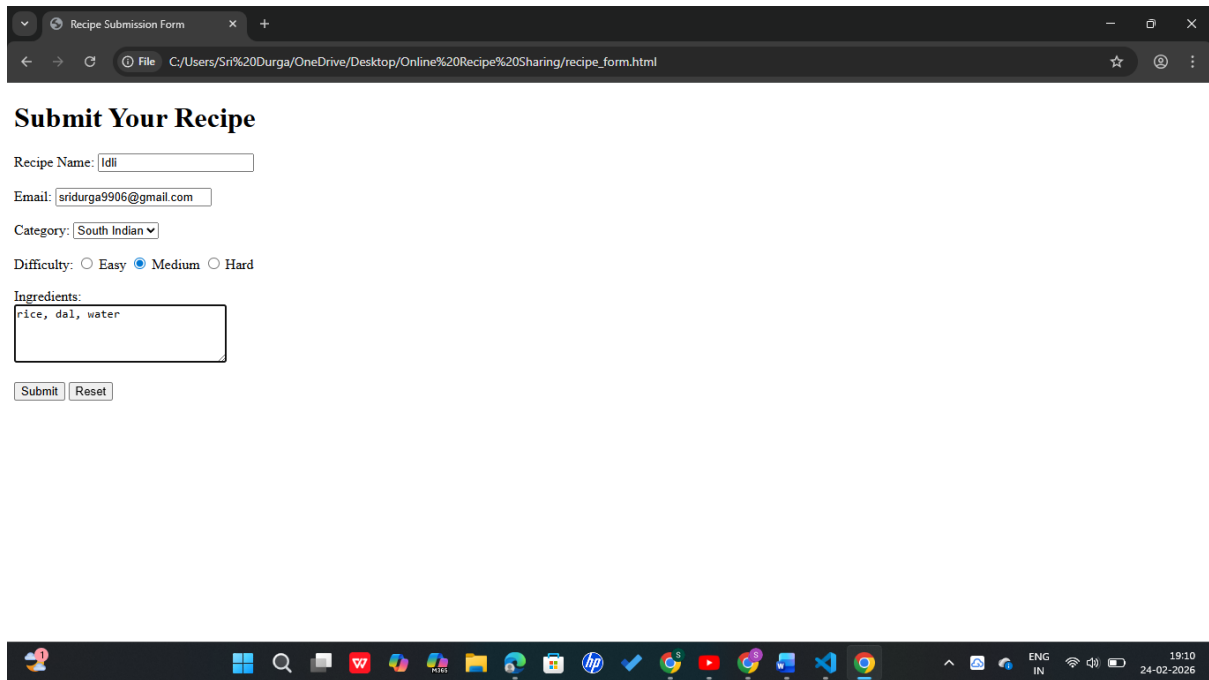

<input type="reset">

</form>

</body>

</html>

OUTPUT:

The screenshot shows a web browser window titled 'Recipe Submission Form'. The address bar displays the file path: C:/Users/Sri%20Durga/OneDrive/Desktop/Online%20Recipe%20Sharing/recipe_form.html. The form itself is titled 'Submit Your Recipe' and contains the following fields and controls:

- Recipe Name:** A text input field containing 'Idli'.
- Email:** A text input field containing 'sridurga9906@gmail.com'.
- Category:** A dropdown menu with 'South Indian' selected.
- Difficulty:** Radio buttons for 'Easy', 'Medium' (selected), and 'Hard'.
- Ingredients:** A text area containing 'rice, dal, water'.
- Buttons:** 'Submit' and 'Reset' buttons at the bottom.

The Windows taskbar is visible at the bottom of the screen, showing various application icons and the system clock indicating 19:10 on 24-02-2026.

RESULT:

Thus, a Recipe Submission Form was created successfully using HTML form elements.

PROGRAM 5

AIM:

To implement image map and Google map embedding in an Online Recipe Sharing Website.

ALGORITHM:

1. Create frameset page.
2. Embed Google map using iframe.
3. Insert image with usemap attribute.
4. Define map area using coordinates.

5. Link hotspot area to content page.

6. Execute the program.

CODE:

Index2.html:

```
<!DOCTYPE html>
```

```
<html>
```

```
<head>
```

```
<title>Recipe Map</title>
```

```
</head>
```

```
<frameset cols="30%,70%">
```

```
<frame src="map.html">
```

```
<frame src="content.html" name="contentframe">
```

```
</frameset>
```

```
</html>
```

Map.html:

```
<html>
```

```
<body>
```

```
<h3>Recipe Origin Map</h3>
```

```
<iframe
```

```
src="https://www.google.com/maps?q=Chennai&output=embed"
```

width="400"

height="300">

</iframe>

<map name="recipemap">

<area shape="rect" coords="50,50,200,200"

href="content.html" target="contentframe">

</map>

</body>

</html>

Content.html:

<html>

<body>

<h3>Recipe Origin Map</h3>

<iframe

src="https://www.google.com/maps?q=Chennai&output=embed"

```
width="400"
```

```
height="300">
```

```
</iframe>
```

```
<br><br>
```

```

```

```
<map name="recipemap">
```

```
<area shape="rect" coords="50,50,200,200"
```

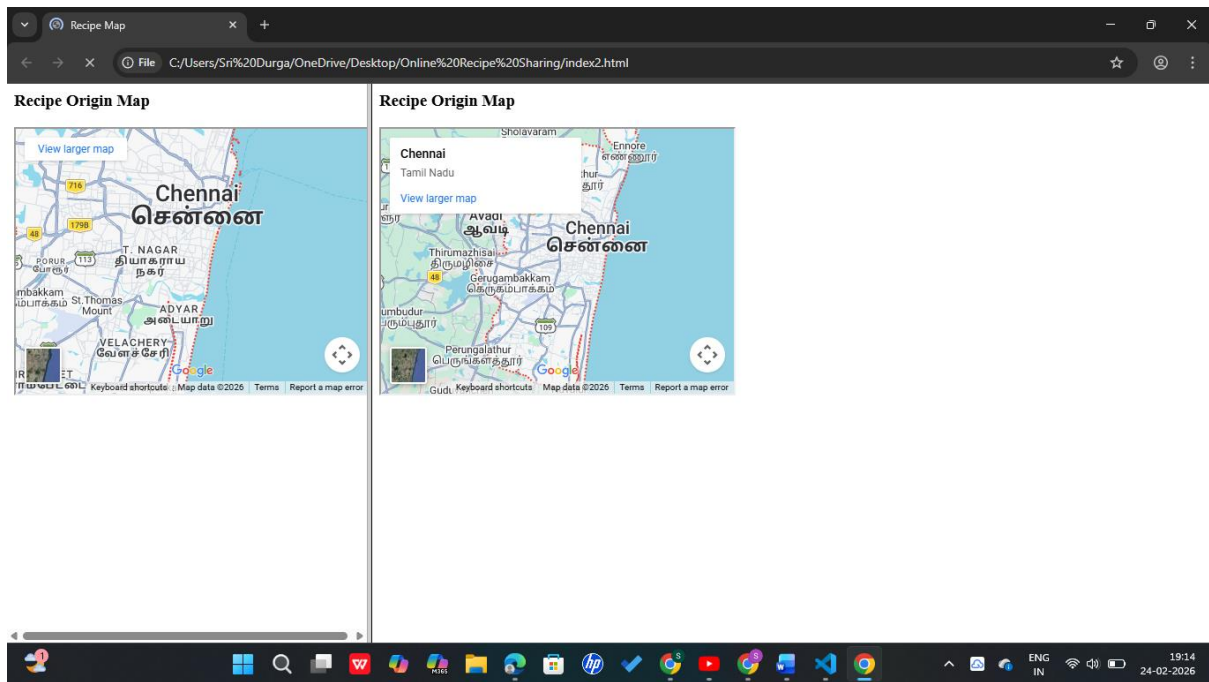

```
href="content.html" target="contentframe">
```

```
</map>
```

```
</body>
```

```
</html>
```

OUTPUT:

RESULT:

Thus, Google map embedding and image map were implemented successfully in the Online Recipe Sharing Website.
